Survey includes:	CS Smart-Worx Viva	CS Smart-Worx Viva LT																																																																																																																																																					
• Survey	●	●																																																																																																																																																					
• Code points	●	○																																																																																																																																																					
• Auto points recording	●	-																																																																																																																																																					
• Remote Heights	●	-																																																																																																																																																					
• Target Offset calculations	●	●																																																																																																																																																					
<hr/>																																																																																																																																																							
Setup includes:																																																																																																																																																							
• Get station coordinates from GPS, from job or enter manually	●	○																																																																																																																																																					
• Orientation by known Azimuth	●	●																																																																																																																																																					
• Orientation by known Backsight	●	-																																																																																																																																																					
• Orientation & Height transfer up to 10 target points	●	●																																																																																																																																																					
• Resection up to 10 target points	●	●																																																																																																																																																					
• Resection Helmert	●	-																																																																																																																																																					
• Orientation to Line	●	●																																																																																																																																																					
<hr/>																																																																																																																																																							
Stakeout includes:																																																																																																																																																							
• Navigate to point using various methods: North, point, to and from total station	●	○																																																																																																																																																					
• Quality control - checking of coordinate differences before storing	●	-																																																																																																																																																					
• Automatic selection of next closest point to stake	●	-																																																																																																																																																					
• Graphical selection of point from map	●	-																																																																																																																																																					
• Edit heights and offset heights of points	●	-																																																																																																																																																					
• Acoustic "reversing beep" when getting closer to point	●	-																																																																																																																																																					
<hr/>																																																																																																																																																							
COGO includes:																																																																																																																																																							
• Inverse	●	●																																																																																																																																																					
• Traverse	●	●																																																																																																																																																					
• Intersections	●	●																																																																																																																																																					
• Line calculations	●	●																																																																																																																																																					
• Arc calculations	●	●																																																																																																																																																					
• Angle and curve calculator	●	●																																																																																																																																																					
• Shift, Rotate & Scale (manual)	●	●																																																																																																																																																					
• Shift, Rotate & Scale (match Points)	●	●																																																																																																																																																					
<hr/>																																																																																																																																																							
Determine coordinate system:																																																																																																																																																							
• 1 step, 2 step, 3D Transformation	●	●																																																																																																																																																					
• All common projections	●	●																																																																																																																																																					
<hr/>																																																																																																																																																							
Alignment Tool Kit:																																																																																																																																																							
• Horizontal alignments	●	●																																																																																																																																																					
• Vertical alignments	●	●																																																																																																																																																					
• Cross sections	●	●																																																																																																																																																					
• Chainage equations	●	●																																																																																																																																																					
<hr/>																																																																																																																																																							
Data import: ASCII, DXF	●	●																																																																																																																																																					
Data export: Custom ASCII, DXF, LandXML, FBK, RW5, RAW	●	●																																																																																																																																																					
<ul style="list-style-type: none"> <li>● All options and functionality available</li> <li>○ Limited options and functionality</li> <li>- Not available</li> </ul>																																																																																																																																																							

**SmartWorX Viva Software - Application Programs****Optional Applications for SmartWorx Viva**

767917	CS COGO Area Division	\$ 150
767919	CS DTM Stakeout	\$ 250
767931	CS Monitoring	\$ 500
767915	CS Reference Line	\$ 250
767916	CS Reference Plane and Grid Scanning	\$ 500
767921	CS RoadRunner	\$ 950
767923	CS RoadRunner Rail	\$ 950
767922	CS RoadRunner Tunnel	\$ 950
777645	CS RoadRunner Importer	\$ 0
767929	CS Sets of Angles	\$ 290
767918	CS Survey Cross Section	\$ 250
767920	CS Surface and Volumes	\$ 295
767926	CS TPS Hidden Point	\$ 250
767927	CS Traverse	\$ 200
789390	Viva CS Unleveled Setup	\$ 2,500
779472	CS10/15 GS05/06 DGPS Functionality	\$ 250
792350	GSW1068, GS12 RTK Ref. station option	\$ 200

		CS Smart-Worx Viva	CS Smart-Worx Viva LT
767 917	<b>CS COGO Area Division</b> Requires COGO application.	●	●
767 919	<b>CS DTM Stakeout</b> Requires Stakeout application.	●	●
767 915	<b>CS Reference Line</b> Requires Stakeout application.	●	○
767 916	<b>CS Reference Plane and Grid Scanning</b>	●	-
767 921	<b>CS RoadRunner</b>	●	○
767 923	<b>CS RoadRunner Rail</b>	●	-
777 645	<b>CS RoadRunner Importer</b>	●	●
767 918	<b>CS Survey Cross Section</b>	●	-
767 920	<b>CS Surface and Volumes</b>	●	●
779 472	<b>DGPS option for Leica Viva Uno</b>	●	●

● All options and functionality available  
 ○ Limited options and functionality  
 - Not available

**Optional Licenses for CS10/CS15 Field Controller**

781486	CS Imaging License - Allows a TS Image to be linked to a CS Database Object	\$ 50
779474	CS Topcon Total Station Control	\$ 90
782287	CS Nikon Total Station Control License	\$ 90
782286	CS Sokkia Total Station Control License	\$ 90

**SmartWorx Viva PC Software**

773894	SmartWorx Viva PC Software - License Key allows SmartWorx Viva Software to run on a PC	\$ Call
